## Cristiana Fedi

Managing Director

Cristiana owes her experience to a long and comprehensive period of training in the family business, until only a few years ago alongside her father, Galeazzo Fedi, who founded the company in 1976. A crescendo of experiences which first of all saw her busy in becoming acquainted with raw materials and then with production and worker organization. Today, she not only directs the company, but also plays a major role in business relations with international customers. Cristiana, faithful

to the legacy received and her passion for things done right, decided to promote the growth of the BORZALINO brand by extending the company's product range which, besides sofas and armchairs, now also boasts top-quality complementary items, and continues to convey to her team all her passion and her firm belief in prime-quality creations made entirely in Italy by Italian craftsmen.

## Matteo Pieri

Project Development Director

Ever since he was a child, Matteo has loved to spend hours in the tailor's workshop fascinated by how the hands of skilled craftsmen managed, on the basis of drawings, to create magnificent sofas. He immediately took interest in furniture design and later made it a constantly growing professional career, which often found him working alongside leading figures in the industry, such as designers like Carlo Bimbi, in order to

develop new projects. Today Matteo, grandson of the company founder, Galeazzo Fedi, represents the third generation of this Italian family-run business, and heads the project development division. He is firmly convinced that innovative design combined with BORZALINO's great sartorial skills is the cornerstone for the creation of one-of-a-kind outstanding-quality products.

# THE TEAM

## Carlo Bimbi

Designer

Carlo began his career in the Italian design world in the Seventies moving masterfully between logic and creativity. His intelligent passion has taken him from collaborating with Nizzoli Associati to the establishment with Gianni Ferrara and Nilo Gioacchini of the Internotredici firm, with which he was among the protagonists of the exhibition Italy: The New Domestic Landscape at the MoMA in New York. Over the years Carlo has designed and continues to design for leading Italian brands and has won prestigious awards such

as the Roscoe-Awards, Blitz, Red Dot and iF Award. He has taught design at the Institute of Art and the I.S.I.A. in Florence besides lecturing in the Industrial Design Degree Course of the Faculty of Architecture of that same city. Being the incurable enthusiast he is, a few years ago Carlo began working as a consultant for the BORZALINO brand, alongside Matteo, to create a line of new products for the international luxury market. His experience is shared with the whole team for which he is an authoritative figure of reference.

## Catia Massaro

Communications consultant and art-director

Catia, after graduating from art school, immediately devoted herself to her favourite subjects: graphics, design and visual communication. Her first work experiences were in the furniture industry; later on she began widening her horizons in other cross-cutting sectors and exploring the many facets of communication and communication tools - from the web to social media marketing right up to printed paper. Thanks to her creative versatility and her multifaceted

nature, in 1996 she set up a consultancy firm. Catia is a major consultant for the BORZALINO brand; she looks after communication concepts and all forms of product image, whether exhibitions, events, showrooms, Web design or product catalogues. Hers is a daily constantly-evolving journey, made up of open dialogue with the BORZALINO team and all those company employees engaged in this important communication project.

# DESIGNERS

## Andrea Andretta

Designer

Born in 1985, Andrea obtained a degree with honours in Industrial and Interior Design at "Università degli studi di Firenze, afterwards broadened his own design experience working for several worldwide furniture brands and interior projects working in different cities as London, Milan Florence and Sydney . His is a philosophy that comes from a pure and modest design, characterize by a continual study of materials where the space is considered as part of balance between objects and their

setting. The artistic trend to which his works belong is based on a formal "lexicon" comprised of a few carefully defined elements in which space is taken into consideration and becomes an integral part of the work. His approach to the project arises from an innate interest for everything that surrounds him without leaving out aesthetic taste, he attributes a functional and pragmatic worth to the objects.

## DEBONADEMEO

Designers

Architect Luca De Bona and designer Dario De Meo met somewhere between Milan and the Veneto region, embarking on a collaboration that drew inspiration from their journey to create designs that responded to contemporary living needs. In 2013, they founded DEBONADEMEO in Padua and began to collaborate with a variety of prestigious furniture, lighting and décor companies, handling interior design, art direction, concept design and product development. Their collaboration is both fairly

specific and wide-reaching, re-interpreting and merging various fields – such as architecture, design, graphics and art – in order to create innovative environments and objects that tell stories and evoke certain emotions in end users. Their projects, which blend romantic expression with a more industrial feel, have appeared in numerous national and international magazines. In addition to their design work, they both teach at various institutions and universities in the field.

## Matteo Bimbi

Designer

Since he was a child Matteo was introduced to the world of art and culture, for which he developed a keen interest and affinity, and when the time came he decided to study Architecture at his hometown Università degli Studi di Firenze. During the university years, that he spent also working in his father's design studio, and doing other formative experiences such as internships and a semester abroad at École nationale supérieure d'architecture de Paris-Belleville, he focuses his research in the relationship between man and his habitat, both the social one of the city and the architectures, and the domestic

one of the home and the objects.

Since obtaining his Master's Degree in 2017 he has kept working for Carlo Bimbi Design studio, where he develops industrial design projects, and also as a freelance architect and designer. He draws inspiration both from the complex and stimulating contemporary world, and from the examples of the past, with a design philosophy that keeps together on one side the aesthetical and functional aspect, and on the other side the building of narratives to connect with people.

## Luca Roccadadria

Designer

I was born in Pesaro in 1990. I define myself as a "street designer," i.e. someone who sees meaning in acquiring skills directly through experience. After studying industrial design, I started working as a designer with a few local studios at the age of 19. Driven by my strong passion, I managed to break into the field. At the age of 24, I decided to try my hand at working independently and took the plunge into freelance work. I now collaborate with a number of renowned studios and companies all over Italy.

My products are known for their marked artistic feel, which is inspired by the world around me, and by times gone by, such as childhood memories. I like to add details to my designs for end users to discover as they become more familiar with their use. I allow functionality to interact with design, employing an unusual combination of materials to create objects that never go out of fashion.

# AYTON

Past and present, tradition and innovation combine in Ayton, a sofa system that generates contrasting sensations: the strict lines of the support contrast with the soft curves of the upholstery, the smooth surfaces combine with soft fabrics and the finest leathers with refined yarns. The austerity of the frame inspired by Nordic geometry of the '50s fades into the informal comfort of a contemporary seat and backrest. Like a flying carpet, the structure rises from the ground in a horizontal plane as if in a shell that encloses a soft and welcoming heart. Ayton is composed of different types of seats and shelves for endless combinations to make it easy to fit at home or in any public environment.

The cabinet-maker's hand makes it "supple" in every curve while the shape and perception of solid wood changes in every direction and the center of each coffee table becomes the seat of precious materials such as stone or netted crystal.

MARQUISE

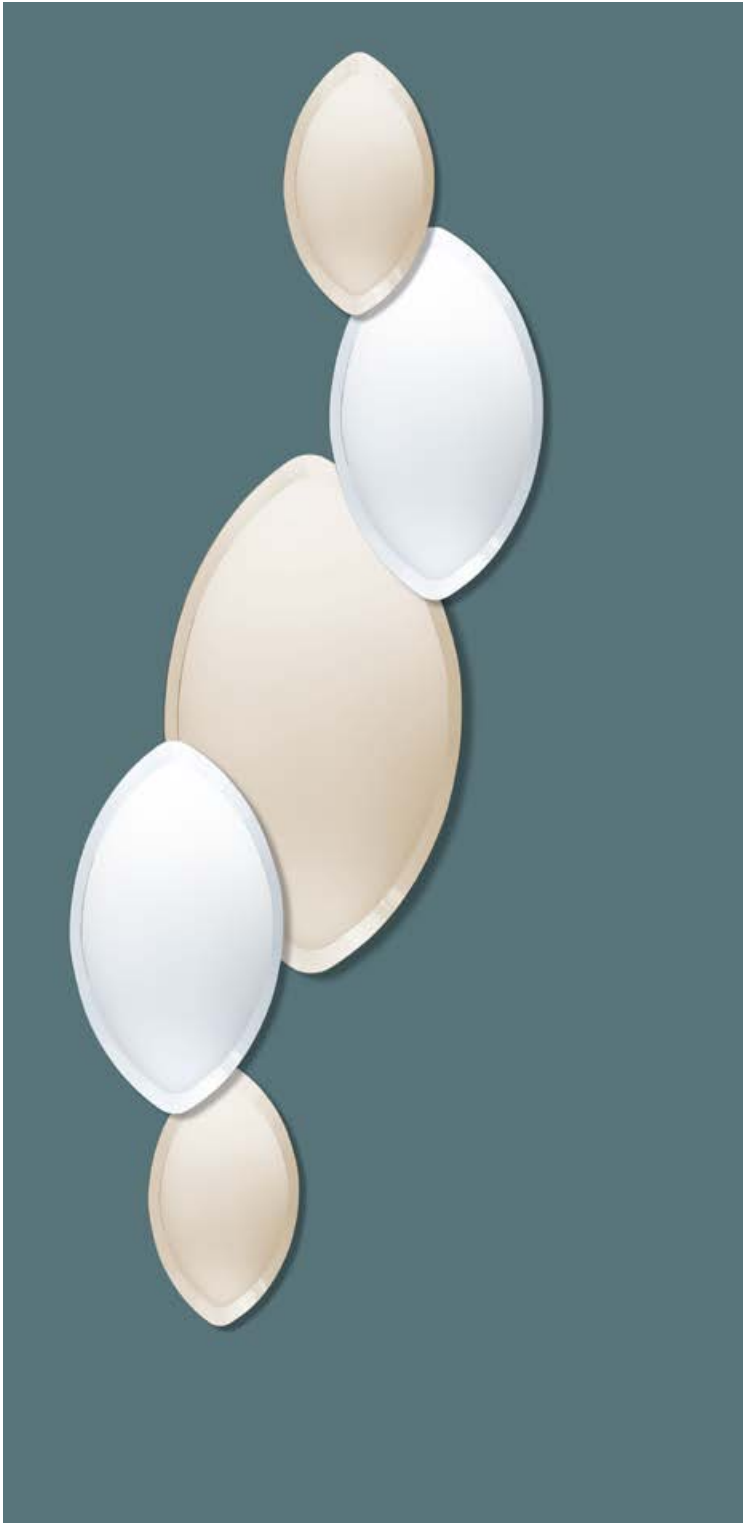

Like a diamond  
This series of Marquise mirrors takes its name from the cut performed on the most precious mineral found in nature: the diamond. This particular oval shape with pointed ends creates a visual composition that goes beyond the intrinsic function of the traditional mirror: the beveling details and the possible color difference complete the composition, granting it elegance.
